Property 1. 2945 Highway 38, Lot 1, Concession 6, Former Kingston Township, now City of Kingston.

Property 1 is an uncultivated agricultural site with clearly defined boundaries delineated by paige wire fencing and fencerows. Glenvale Creek runs through the south western part of the property. Access into the fields is from Rock Road, which is elevated on a raised road bed. There is no visible internal circulation. The views from Rock Road are across flat elevated open fields and terminate at mixed fencerows to the north. Long views from Highway 38 terminate at a mixed woodlot to the east. The evolving cultural landscape components continue to survive and have had little alteration. The relationship to past historical uses, landscapes and settlement patterns are continuing and are clearly discernable.

The property appears to be little altered and has historical associations with nineteenth century agricultural settlement. The 1878 Historical Atlas shows the name Robert Moon as the resident/owner with the crossroads settlement of Glenvale nearby. The property is considered to have direct associations with the historical theme of land settlement and related agricultural activity [Criterion (2) 2. (i)] and contextual value as it is historically linked to its surroundings [Criterion (2) 3. (ii)]

Adjacent (south of) 175 Hegemond Road Lot 39 Concession 4, Former Township of Ernestown, now Loyalist Township.

Property 24 is uncultivated land with vegetation colonizing the property. The property is adjacent to Highway 401 and is distinguished by an internal circulation system of lanes. The land is flat and a creek runs through the site. The evolving cultural landscape components continue to survive and have had little alteration. The relationship to past historical uses, landscapes and settlement patterns are continuing and are discernable.

The property is little altered and has a historical association with agricultural settlement. The historic atlas shows the name of John McCormick as the resident/owner of this lot. The only alteration is the placement of a large, highway scaled, billboard. The property is considered to have direct associations with the historical theme of land settlement and related agricultural activity [Criterion (2) 2. Cultural heritage landscapes. These are defined geographical areas of heritage significance that human activity has modified and that a community values. Such an area involves a grouping(s) of individual heritage features, such as structures, spaces, archaeological sites, and natural elements, which together form a significant type of heritage form distinct from that of its constituent elements or parts. Examples include: villages, parks, gardens, battlefields, mainstreets and neighbourhoods, cemeteries, trails, and industrial complexes of cultural heritage value.

3.0 CULTURAL HERITAGE ASSESSMENT

The properties identified as potential candidate sites for the development of solar energy all comprise generally flat agricultural land, some of which is in agricultural production but much appears to be either marginal or recolonizing in character with naturalization, succession growth.

There still remain traces of former field systems at most of these locations. The results of the brief historical overview reveal that all of the identified properties have some historical association with former land clearance and agricultural settlement.

In accordance with Ontario Regulation 9/06 which identifies a number of criteria for determining cultural heritage value, and as required by Ontario Regulation 359/09 the inventoried properties are considered to have:

- direct associations with the historical theme of land settlement and related agricultural activity [Criterion (2) 2. (i)], and
- contextual value as they are historically linked to their surroundings [Criterion (2)
 3. (ii)].

Given the characteristics of fields as evidence of former historical agricultural practices and farming activity these identified resources are essentially unremarkable in their cultural heritage value.

4.0 CONCLUSIONS

Protected properties

As a result of consultation with designating authorities under the Ontario Heritage Act, none of the identified properties constitute protected properties under Ontario Regulation 359/09.

Cultural heritage value

It is concluded that while all the properties exhibit varying degrees of association with the historical theme of land settlement and related agricultural activity, (namely they are remnant agricultural fields in a larger contextual rural landscape) and possess some contextual value due to historical linkages with their surroundings, none are of sufficient cultural heritage value or interest that would warrant not-developing these lands for solar energy facility.

Mitigation of effects in interior properties

Impacts to heritage resources may be short or long in duration and experienced during construction only or during the post construction phase. Where interior properties (i.e., those without direct road frontage) are proposed to be developed for solar energy

purposes these properties are considered to have less visual exposure within the rural landscape, such as the eastern side of Quabbin Road. Existing vegetation and screening for the most part will provide visual buffering or filtering of extended views to these properties from the public road right-of way and should be protected and retained. Although not required for interior properties with some degree of visual buffering or filtering, additional visual buffering will be considered for interior properties as detailed design proceeds.

Mitigation of effects in properties adjacent to road rights-of -way

At those locations adjacent to a road right of way, (Unity Road, the south side of Mud Lake Road, the west side of Howes Road, the north side of Rock Road, and the west side of Highway 38) the solar facility may be open to view. Mitigation of views may be provided by the installation of screening devices. The locations of screening devices will be determined during detail design with consideration given to the findings of this report; public and municipal consultation; and, engineering and property constraints. These should be derived from traditional fencing and vegetative plantings in keeping with those examples found in the general area. The following list of species may be used for mitigation applications as a mixed vegetated fencerow in areas where resulting tree height will not result in shading of the solar panels.

Recommended Trees:

Red Maple Acer rubrum

Serviceberry Amelanchier canadensis*

Sugar Maple Acer saccharum
Silver Maple Acer saccharinum
Japanese Dogwood Cornus kosus*
Pagoda Dogwood Cornus alternifolia*
Black Walnut Junglans nigra
Tamarack Larix laricina

Norway Spruce *Picea abies* (Historically planted in rural areas)

White Spruce Picea glauca Jack Pine Pinus banksiana Red Pine Pinus resinosa White Pine Pinus strobus Scots Pine Pinus sylvestris Red Oak Quercus rubra White Oak Quercus alba White Cedar Thuja occidentalis

Recommended Shrubs:

^{*}Tree Varieties 4.5 m to 9 m in height

Silky Dogwood Cornus amonum
Red Osier Dogwood Cornus sericea
Scarlet Hawthorn Crataegus coccinea
Highbush Cranberry Viburnum trilobum
Nannyberry Viburnum lentago

Mitigation of potential visual effects on built heritage resources

Although several built heritage resources have been identified through field survey such features will not be demolished or removed as a result of property development for the solar facility. Screening devices may be appropriate at certain locations, such as the area between Properties 14B and 14C, as backdrops to identified features to prevent silhouetting of the built heritage resources against solar facility. As each property is unique, specific site mitigation measures ,where required, will be determined during detailed design through consultation with the landowner and with consideration to engineering and property constraints.

3578 Unity Road, adjacent to Property 3

The log structure recorded at this site was moved to this location from elsewhere (Personal communication with owner, September 27, 2011). It does not form part of a property to be developed. No mitigation is required or recommended.

Westbrook Road, Property 12

In the case of Property 12 where the remnants of log structure were identified this should be noted for potential archaeological mitigation. The remnant structure is rightly described as a "ruin" and falls under the purview of archaeology as defined in Subsection 1(2) of Ontario Regulation 359/09.

4017 Unity Road, Land located between Property 14B and 14C

The stone farmhouse and frame barn are located between two properties identified as solar energy project sites and are not anticipated to be demolished or removed as part of this project. If the adjacent properties are to be developed attention should be given to addressing edge treatments or buffer and screening devices around the periphery of these features to filter or break up views to any solar energy facility beyond. The locations and type of treatment, if required, will be determined in consultation with the landowner and with consideration of engineering and property constraints. The following list of species would be recommended for any future mitigation applications and to be installed as a mixed vegetated fencerow with the inclusion of cedar rail fencing where required by landowner agreements.

Recommended Trees:

Red Maple Acer rubrum
Sugar Maple Acer saccharum

Serviceberry Amelanchier canadensis*

Japanese Dogwood *Cornus kosus**Pagoda Dogwood *Cornus alternifolia**

Tamarack
Norway Spruce
White Spruce
White Pine
Scots Pine
Red Oak
White Cedar

Larix laricina
Picea abies
Picea glauca

Recommended Shrubs:

Scarlet Hawthorn Crataegus coccinea
Highbush Cranberry Viburnum trilobum
Nannyberry Viburnum lentago

5.0 RECOMMENDATIONS

It is recommended that in any development or construction management plan developed for the subject properties that appropriate mitigation strategies be adopted to address the potential impacts or effects of solar facility as noted in Section 4.

Hi David,

You are correct in your findings as the Trust does not have any easement properties within the study area. While the register does not exist on the Trust's website you can contact my colleague Jim Leonard with any questions regarding the register. His contact info is below.

Dear Ms. Aravopoulos,

We have been retained by the consulting firm of AMEC on behalf of their client Samsung to undertake a cultural heritage assessment of lands within Loyalist Township and the City of Kingston.

In Loyalist Township the study area is irregular in shape and is generally bounded by Mud Lake Road North and the Odessa Lake shore in the west and north, Howes Road to the east and Highway 401 to the south.

In the City of Kingston the area is generally bounded by Howes Road to the west, the Odessa Lake shore in the north, Highway 38 to the east and Highway 401 to the south.

The study area characteristics are such that the potential locations for this

renewable energy project will be contained within open areas of land, typically fields or former field systems.

As required by legislation we are required to identify any properties that are contained within the municipal register of properties of cultural heritage value or interest established under Part IV of the Ontario Heritage Act. These can either be properties designated by by-law or those properties that are non-designated but have been included for temporary protection against demolition. This has been undertaken and contact with both municipalities has not revealed any designated heritage properties.

We are also required to identify any properties designated by the Minister of Tourism and Culture and cultural heritage easements held by the OHT. We have attempted to search the OHT website for the Register under Section 23 of the Act but it appears that the on-line site does not contain any listing of OHT easement properties and I can find no properties or municipal addresses that are located within our study area.

Please can you confirm that our findings and conclusions are correct with respect to the absence of any OHT easement properties within our study area. If the register has been included in your web pages we would also appreciate being advised where it is located. A response by November 4th, 2011 would be appreciated.

On behalf of MHBC, AMEC and Samsung we would take this opportunity to thank you in advance for your assistance in this matter.

If you have any questions please contact Jessica Tivy at extension 727.

Hello David,

It appears that a property with the civic address of 2555 Highway 38 shows up on our system as being a 'listed' property, however I would like to look into this further prior to providing you with a definitive answer. I will follow-up on this and get back to you.

It appears that there are no other properties on our municipal heritage properties register that are located in your study area.

Subject: 08146AE, Cultural Heritage Assessment Study, renewable energy project

Hi Lindsay: I have been out of the office and am following up on my email sent in September regarding lands north of Highway 401 and east of Loyalist Township. You may recall that we have been retained by the consulting firm of AMEC on behalf of their client Samsung to undertake a cultural heritage assessment of lands within both Loyalist Township and the City of Kingston. The study area is irregular in shape and is generally bounded by, Howes Road to the west, the Odessa Lake shore in the north, Highway 38 to the east and Highway 401 to the south.

As required by legislation we are required to identify any properties that are

contained within the municipal register of properties of cultural heritage value or interest established under Part IV of the Ontario Heritage Act. These can either be properties designated by by-law or those properties that are non-designated but have been included for temporary protection against demolition.

We have reviewed the municipal register on line and can find no properties or municipal addresses that are contained in the register that also are located within our study area.

Please can you confirm that our findings and conclusions are correct. If the register has been updated since inclusion in your web pages we would also appreciate being advised. A response by October 26th, 2011 would be appreciated.

On behalf of MHBC, AMEC and Samsung we would take this opportunity to thank you in advance for your assistance in this matter.

Hello Mr. Cumming

I have reviewed the properties you have identified in Loyalist Township and I can confirm that there are no designated properties in the subject area and no properties that are subject to temporary protection against demolition.

I am the staff member in charge of heritage planning matters. If you have any further questions, please contact me by email or phone.
