

NOTICE OF DRAFT REA DOCUMENT RELEASE

Sol-Luce Kingston Solar PV Energy Project City of Kingston and Loyalist Township

Revised Draft Noise Study Report Available July 15, 2012 For 30 Day Public Review

Kingston Solar LP is planning to engage in a renewable energy project, which will require the issuance of a Renewable Energy Approval (REA). The proposed facility is to be known as the "Sol-luce Kingston Solar PV Energy Project". If approved, the Class 3 Solar Facility would have a total maximum name plate capacity of 100 MW. It is proposed that this facility will convert solar energy into electricity to be fed into the Hydro One electricity grid. The output from each of the solar sites will be collected and routed to an electrical substation, in the vicinity of Unity Road, which will interconnect to the Hydro One transmission lines. The Project lands will be a series of leased sites located to the north and south of Unity Road as well as south of Mud Lake Road in the City of Kingston and Loyalist Township. The Project lands will consist of approximately 261 hectares of land.

As part of the application for a Renewable Energy Approval, the environmental studies and draft reports have been completed for regulatory approval and made available for public inspection on June 15, 2012

Kingston Solar LP would like to inform your community that a revised version of the Draft Noise Study Report for the Sol-luce Kingston Solar PV Energy Project will be available for public inspection as of July 15, 2012 at the following locations:

Documents for Public Inspection:

- Proponent's website (www.samsungrenewableenergy.ca/kingston)
- City of Kingston, City Hall, Clerk's Office, 216 Ontario Street, Ontario
- Kingston Frontenac Public Library- Isabel Turner Branch, 935 Gardiners Road, Kingston, Ontario
- Loyalist Township, 263 Main Street, Odessa, Ontario
- Odessa Branch Library, 102 Main Street, Odessa, Ontario
- County of Lennox-Addington, 97 Thomas Street East, Napanee, Ontario

The revised Draft Noise Study Report includes additional details on predicted sound levels at adjacent vacant lots and cumulative sound levels with other nearby renewable energy projects. The report concludes that predicted sound levels at adjacent vacant lots or resulting from the combination of sound levels from nearby projects do not exceed Ontario Ministry of Environment guidelines.
